PROFESSIONAL SUMMARY

Aspiring Software Engineer with strong proficiency in Java, Data Structures & Algorithms, and Full-Stack Web Development. Experienced in building scalable web applications using Next.js, React, TypeScript, Prisma, and MongoDB. Passionate about solving real-world problems and developing high-quality software solutions.

EDUCATION

Indian Institute of Information Technology, Dharwad

Bachelor of Technology (B.Tech), Undergraduate

2028

CGPA: 8.12/10

TECHNICAL SKILLS

- **Programming Languages:** Java, JavaScript, TypeScript, Python, MySQL
- **Frameworks & Technologies:** Next.js, React.js, Node.js, Express.js, Tailwind CSS, Prisma ORM, Auth.js
- **Developer Tools:** Git, GitHub, VS Code, Postman, Monaco Editor, WebContainers API, Xterm.js, npm

PROJECTS

VibeCode Editor | AI-Powered Browser IDE

Next.js, React, TypeScript, Tailwind CSS, Monaco Editor, WebContainers API, Prisma ORM, MongoDB, Auth.js, Xterm.js

- Developed a full-stack, browser-based code editor delivering an IDE-like development experience with in-browser code execution and live preview.
- Implemented secure OAuth-based authentication using Auth.js to manage user sessions and protect application routes.
- Integrated Monaco Editor and Xterm.js to provide real-time code editing and an interactive in-browser terminal.
- Leveraged the WebContainers API to enable sandboxed, in-browser Node.js execution without server-side infrastructure.
- Designed and modeled application data using Prisma ORM with MongoDB for efficient and scalable data persistence.

RiverFlow | Q&A Platform

Next.js, React, TypeScript, Tailwind CSS, Appwrite

- Developed a full-featured developer Q&A platform inspired by Stack Overflow, supporting question posting, answers, and comments.
- Implemented user authentication and authorization workflows using Appwrite for secure account management.
- Developed a voting system and markdown-based rich text editor to enhance content readability and community engagement.
- Added image attachment support to enrich question and answer content with visual context.

Project Camp | Collaborative Project Management API

JavaScript, Node.js, Express, MongoDB, Nodemailer, Multer

- Designed and developed a RESTful API service to support collaborative project management for teams.
- Built task and subtask management modules enabling structured organization of team workflows.
- Implemented role-based access control (RBAC) to enforce secure, permission-based user authentication and authorization.
- Integrated Nodemailer for automated email notifications and Multer for handling file uploads within projects.

ACHIEVEMENTS

- Secured **1st Place** at **HackMaze 2.0 Hackathon 2026** for developing an innovative software and hardware solution in a competitive hackathon environment.
- Secured **3rd Place** at **Hindustan Aeronautics Limited (HAL) Aerothon 2026**, a 24-hour national hackathon, for designing and developing an innovative technology solution.
